

## DynamicVision

Motorized wall mount for videoconference cameras

### Highlights

- Motorized wall mount for videoconference cameras
- AHDV01: Upwards moving cover
- AHDV02: Downwards moving cover
- Compatible with the most popular videoconference cameras
- Cover prepared for veneering
- RS-422 and Infrared controllable
- Easy to install

### General

DynamicVision provides the ideal solution to conceal video conference cameras and controls, improving the interior design of the conference room with its easily adaptable front enclosure that can be covered with various materials. The camera is activated via RS-422 or infrared.

When not required, it's neatly stored away, both protecting the camera and securing the work environment. The front enclosure moves vertically to display the camera while moving the camera forward simultaneously. DynamicVision is the perfect solution for systems integrators, architects, interior designers and space planners. The camera can be neatly stored away when not in use.

## Technical Specifications

| Movements             |                            |
|-----------------------|----------------------------|
